

## General tender text for snow poles

*When writing in italics, one of the possible positions must be selected.*

Pos.

01.01.01 \_\_\_\_\_ pieces

### **Round plastic snow pole**

Diameter: 50 mm without inner contour

Length: 1.00m or 1.25m or 1.50m or 2.00m or 2.50m

Material: UV & dimensionally stable, impact-resistant plastic

Colour: dyed orange

Special plastic, dimensionally stable up to at least 50 Nm without permanent deformation

Likewise, no deformation when stored on one side or in direct sunlight

Equipped with a cone tip and cap for hammering into the ground suitable with a hammer

### **Options:**

with impact-resistant plastic cap

with fully closed plastic cone tip

with reflective foil at the upper end, height 30 cm, type RA2/C in silver-white and reflects white when exposed to light

01.01.02 \_\_\_\_\_ pieces

### **Plastic triangular snow pole**

Dimensions: width 44 mm, height 50 mm, rounded edges with a radius of approx. 10 mm

Length: 1.00 m

Material: UV & dimensionally stable, impact-resistant plastic

Colour: dyed orange

Outer contour adapted to the delineator

### **Options:**

with white plastic reflectors on both sides, 120x18 mm, fastened with non-rusting screws, the reflection angle of the reflectors is the same as that of the delineator reflectors

01.01.03 \_\_\_\_\_ pieces

Delineator cap for snow pole

Attachment cap suitable for delineators according to HLB 1957 to accommodate snow pole

Material: Plastic

Length: approx. 180mm

Colour: solid white

Attachment cap incl. 2 mounting brackets made in one piece without

Attachments and third-party parts including 2 mounting brackets

First mounting bracket for inserting a snow rod with a diameter approx. 50 mm to the lower end of the delineator post (soil)

Second mounting bracket with limitation suitable for round snow poles

Diameter approx. 50 mm and triangular snow poles approx. 50 x 44mm (edge radius approx. 10 mm) Insertion depth of the snow guide rods approx. 160 mm including anti-twist protection and diameter compensation (compensation ribs for a secure fit)

01.01.04 \_\_\_\_\_ pieces

Scratch Board Marker

Marker: Plastic snow guide, round, diameter 50mm

Length: 0.50m

Colour: dyed orange

Reflective film at the top approx. 30 cm, type RA2/C in silver-white and with incidence of light

white reflective

with galvanized steel clamp bracket with 2 screws M10x25 for attachment any point on the rail of the steel crash barrier.
